

Curriculum:

At Wonder Years Learning Center, LLC. we believe every child should and will have the same opportunities for growth and development. These opportunities are afforded through opportunities to explore, experiment, be creative, and learn through play. In understanding that the individual child is just as important as the group, these opportunities are afforded in various platforms throughout the day. All the while, children are growing and developing to be better prepared for Kindergarten and their education beyond the center. Our program will be most effective when we are able to partner with families and our community. Parents are recognized as their child's first teacher and all families are treated with dignity and respect.

The importance of family is an integral part of our program beliefs. Families stay informed of center happenings through open communication with staff, in addition to newsletters, social media postings, and text alerts. Families are also welcomed into the center for a variety of activities throughout the year.

In accordance with our vision, the center utilizes *The Creative Curriculum* program, a Delaware STARS approved curriculum, which aligns with the *Delaware Early Learning Foundations*. The following are links for pre-school and infant and toddler *Delaware Early Learning Foundations* standards.
